

Items Addressed in the VTECS Connect 2.2 Update

NOTE: Since some of the enhancements made to *VTECS Connect™ 2.1* are significant, this update changes *VTECS Connect 2.1* to *VTECS Connect 2.2*.

Import of Student Data from Other Systems

1. **VTECS Connect 2.2** includes a link to the **VTECS Connect™ Student Data Import from MS Excel®** program. The new data import program imports student records into VTECS Connect from other student record management systems. The program uses Microsoft Excel as the “bridge” to move the data. Step-by-step instructions for using the program are contained in Help system of *Connect*.

Reports

2. **Time and Attendance Report** - a date sorting issue was corrected.
3. **Monthly Coordination Report** - the "Cluster Area" label in the dialog was modified to allow “all” to be selected.
4. **Reports – Print to file** – added option to save the report in pdf format to several reports

Student Record Entry

5. **“Save and Next” button** - A “Save and Next” button has been added to the student record screen to expedite data entry from one student record to the next. Since users often update the same information for a group of students at one time, the “Save and Next” button streamlines the data-entry process by eliminating the need to close and open each student’s record.
6. **Work/Wage entry** - A “Set as Default” check-box is on the Work/Wage entry screen. This feature saves time when you need to enter several work-wage records and some of the information is the same on each record.

VTECS Connect™ 2.2 Update Release History

2008-3-18 2.2.0.1

- * Fixed issue when update is applied to 20021218 version of Connect, with no intermediate updates.
